

COUPLING SKYVIEW TO AIRCRAFT AVIONICS

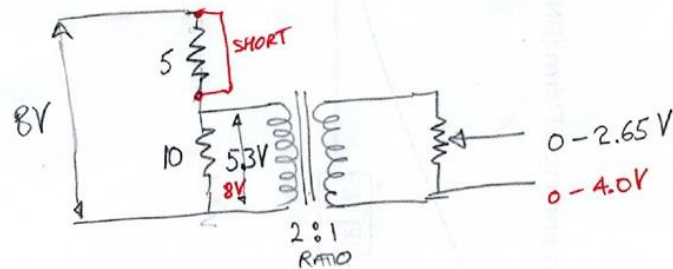

WAGA SkyView speaker output approx 8V peak to peak
 $= 2.839 \text{ V}_{\text{RMS}}$

Avionics Aux Input needs approx 3V peak to peak
 $= 1.06 \text{ V}_{\text{RMS}}$
 (from testing) (but from testing 4V peak to peak is best)

Requires Isolating transformer, eliminates ground loops and matches SkyView speaker output to Avionics Aux input voltage level.

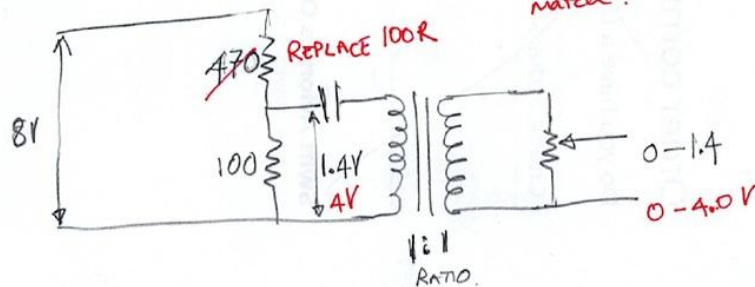

ALTRONICS (Part # C9620A) Requires modification to match.

(no de-coupling capacitor)

JAY CAR (Part # AA0482)

Requires modification to match.

Voltage divider $\frac{100}{470+100} = 0.175$

Altronics C9620A

Jaycar AA0482
